

Ahearn & Soper Inc. will help you provide a more reliable and accurate alternative to manual inspection and ensure your products are safe.

VISION SYSTEMS

- 100% Complete inspection and identification
- High speed or low speed applications

APPLICATION EVALUATION AND ENGINEERING

Our vision application engineers first prepare a no-charge prequalification vision evaluation to confirm application feasibility. Next a technical report provides product recommendations for lighting, lens, and vision sensor equipment; fixturing requirements; and application solution design.

DELIVERING THE INSPECTION SOLUTION

Ahearn & Soper can design, fabricate and deliver fully assembled and tested vision systems that incorporate controllers and cameras along with a wide variety of post automation products.

SOFTWARE SUPPORT FOR VISION & AUTOMATION INTEGRATION

In addition to the vision lab's evaluation and recommendations, our field application engineers assist with installation and support of your engineering staff in the configuration, installation, start-up and commissioning of products and systems. They can also provide system integration consulting services:

- ERP/MRP/MES integration with manufacturing systems
- Supervisory Control & Data Acquisition (SCADA) & Human Machine
- Interface (HMI) Development
- Relationship Database Development

Call **Ahearn & Soper Inc.** TODAY ... we will find solutions for all your application needs!

Some of the components we offer:

Vision Inspection: Our Automation experts will fill all your vision needs from character recognition & gauging to part detection.

Data Acquisition & Reporting: Whether your application requires custom software or packaged integration, we will accurately collect your data.

Automated Marking & Labeling: We can meet all your labeling requirements from Barcode applicators to lasers.

Control Systems: Whether your system is OMRON, Allen-Bradley, Siemens or Mitsubishi, we can control your application.

We will ensure the right date, lot or product code is printed, the right labels onto the right products, and the right product is placed into a carton or box.

Reliable Pharmaceutical Applications

- Cap |Seal Inspection
- Glass Inspection
- Fill Inspection
- Blister Pack
- OCR| OCV Inspection
- Sterilization Track and Trace
- E-Pedigree Marking Inspection
- Tablet | Capsule
- Label Identification
