

Datacard® 275 Card Personalization System

Realize simple, affordable plastic card personalization

Too often, budget limitations prevent hospitals from taking advantage of embossing technologies that offer substantial cost-savings. We understand this dilemma. That is why we offer the value-priced Datacard® 275 card personalization system.

The Datacard 275 system offers fast, quiet and reliable embossing at an affordable price. Now, even the most cost-conscious healthcare providers can justify the investment in plastic card technology.

Increase staff productivity

The 275 system's basic embossing capabilities enable you to quickly and accurately identify patients and track their charges, while cutting costs through increased productivity. Your staff members simply make a single imprint with an embossed plastic card to identify patient documents. The secure 275 system replaces traditional processes that are often wasteful, erroneous and time-consuming.

Save time and money with powerful options

To boost efficiency even more, the 275 system offers several productive options, including a pop-up keyboard and wristband/label printer. In addition, the system is easy to install and configure. That simplifies integration and places minimal burden on your information technology department.

Utilize a full line of solutions designed to increase patient loyalty

To complement our value-priced 275 system, we also offer the Datacard® 295 card personalization system. The Datacard 295 system features standard embossing capabilities in a modular design that lets you personalize smart cards, encode magnetic stripes and print graphics. These tools offer faster, more convenient healthcare for patients. You can use this system to automate patient admitting and more accurately track and identify your patients through images and bar codes.

Expert service through planning, implementation and maintenance

Datacard is committed to providing outstanding support for all its solutions, no matter where they are installed around the globe. Our network of service specialists provides support in more than 120 countries worldwide. Our comprehensive professional service offerings include smart card planning and consulting, integration and customization, card issuance, program management, implementation planning, onsite installation, software support and training. These offerings extend beyond traditional hardware services to provide complete turnkey services for our customers.

Your best choice for supplies

Protect your investment in Datacard® solutions by only using Datacard® Certified Supplies. You can count on Datacard for all of your supplies needs. We engineer superior performance and reliability into every system-matched supply item we offer. For you, that means smooth printing, brilliant image quality, high security and exceptional performance. Worldwide representation creates a fast, direct connection with the supplies and support you need, when and where you need them.

The Datacard® 275 system lets healthcare providers realize the benefits of plastic card technology without making a large capital investment.
