

Vocollect Talkman A500

The Highest Performing
and Extensible Workflow
Solution for DCs

The Vocollect Talkman[®] A500 is an extensible voice-centric mobile computing voice appliance that enables high-performance, hands-free, and eyes-free workflows. It is the first Vocollect device to leverage the Next-Generation Vocollect Voice[®] software suite based on VoiceCatalyst[™], making it the best solution to enable voice in all of your workflows throughout your distribution center (DC) or warehouse.

The Talkman A500 running VoiceCatalyst offers the following benefits:

- Supports many configurations from voice-only to voice combined with supplemental functions such as a scanner or display
- Enables more dynamic interaction between enterprise systems and your mobile workers on the floor
- Provides access to enhanced asset management and voice-centric usage statistics
- Offers a customizable user experience for mobile workers
- Provides a simple migration path for current customers who want to get more out of their Vocollect Voice system

In addition, the Talkman A500 carries on the tradition of Vocollect's voice solutions by enabling 10-20% gains in productivity and greater than 99.99% accuracy across most DC workflows. It also provides industry-leading, industrial-grade speech recognition for high-speed productivity.

A Proven Solution with Expanded Capabilities

The Talkman A500 leverages the award-winning form factor of the Talkman T5, making it a proven, robust solution that is also one of the most technologically advanced mobile devices available that can withstand the harsh environments of DCs. The

expanded capabilities of the Talkman A500 enable current and new customers to use voice as the foundation for all of their workflows in the DC. The Talkman A500 is the first Vocollect device that customers can wirelessly connect to Bluetooth[®]-enabled display devices. As a result, customers can now voice-enable workflows that require mobile workers to occasionally reference long lists or images that may be best viewed on a display.

Compared to other Talkman devices, the A500 features:

- A new, much more powerful processor
- More flash and RAM
- A more robust radio with expanded band capabilities

The Talkman A500 uses the same chargers, headsets and batteries as the Talkman T5 series. It is also available with VoiceClient software to use the same Tasks – easing side-by-side installations and

extending customers' prior investments. Customers using the Talkman A500 today can easily migrate to the new VoiceCatalyst software environment when needed to take advantage of the solution's extended capabilities and workflows.

Features and Benefits of the A500

Extensible

- One solution for multiple workflows, door to door
- Support for multiple deployment options:
 - Voice-only
 - Voice plus scanning
 - Voice plus display
 - Voice plus mobile printing
 - Voice plus combinations of scanning, mobile printing, and/or display

The Speed of Voice - Amplified

- Up to 25% improvement in speech processing
- Same battery as a Talkman T5, with longer life
- Seamlessly switch from one workflow to another
- Provides real-time critical information to your mobile workers, even as situations change
- Wirelessly re-route your operations as needed, even mid-shift

Low Total Cost of Ownership

- Compatible with scanners, mobile printers, and display peripherals
- Let workflow processes drive needed functionality so you only add functions to supplement voice when it makes sense
- Outfit your mobile workers just with the tools they need – don't burden them with unnecessary components

Vocollect Premium Industrial Wearable Featuring Talkman A500	
Vocollect Voice Software	
Voice Software	VoiceCatalyst or VoiceClient®
Management Software	VoiceConsole®
Process Software	VoiceApplications™ or Tasks
Operating System	Windows CE® 6
Processor	OMAP @ 500MHz
Memory	256MB RAM, 512MB Flash
Bluetooth	Version 2.1
Radio	802.11a/b/g or 822.11b/g
Serial Ports	One
Operating Temperature	-22° to 122° F (-30° to 50° C)
Storage Temperature	-40° to 158° F (-40° to 70° C)
Drop Tested	Four drops from 5 feet on six surfaces (24 drops). Two drops from 6 feet on six surfaces (12 drops).
Battery	4400mAh
Humidity	100% Condensing
Rain/Dust Sealing Rating	IP67
Accessory Support	
Headsets	Complete SR Series, SRX, and SL-14
Peripherals	Scanners Mobile Printers Displays
